

SPLASH & PLAY

Water Attractions Made Easy

Smart Water Play

We design water attractions that bring playful moments and unforgettable experiences. Our durable and functional products are ideal for both commercial and public spaces, offering interactive and engaging environments for visitors.

With a focus on simplicity and cost-effective solutions, we help you create impressive facilities – from construction to daily operations. Our smart systems make it easy to bring your vision to life and deliver amazing experiences for your guests.

Adapt to Fit Your Space and Requirements

Water Stop - No pool needed!

The water flows down with the riders and lands in a small shallow pool where the slide ends. A safe and fun landing, perfect for younger children and smaller areas.

Shallow Pool (15 cm deep)

A pool with a safe depth suitable for younger children. The water play can be enhanced with other features, such as fountains and spraying water cannons. Ideal for family-friendly water parks.

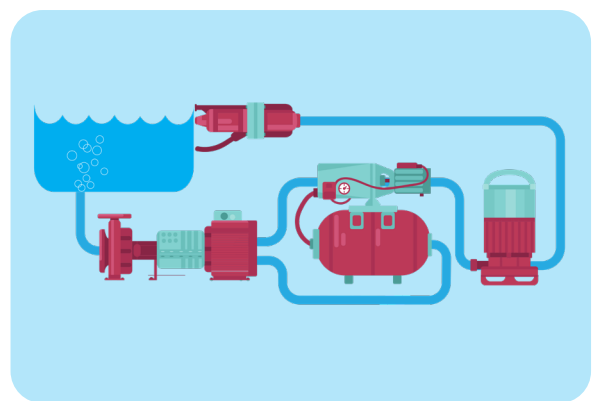

Pool for deeper water

For a more challenging experience, the play structure can be placed in a deeper pool. Perfect for older children and adults seeking a more exciting water adventure.

Easy to Set-Up, Operate and Maintain

The filtration system and water pumps are engineered for minimal maintenance, ensuring reliable and hassle-free operation. The filtration system functions similarly to those used in residential pools, providing a straightforward and effective solution for clean and safe water.

We are happy to assist with every step of the process, from initial planning and detailed drawings to plumbing and installation, ensuring a smooth and hassle-free experience for you.

SBI Play stems from SB International, bringing years of expertise in outdoor play. With our extensive experience, we analyze what users find most enjoyable, ensuring you get the maximum return on your investment.

The products meet all safety requirements and thematic needs in various parks.
