Payment system

A more accessible payment system makes the park easier to use for all guests. Simple and fast payment removes barriers such as cash or complex steps. This increases guest engagement and use of park offerings, while improving guest flow and overall revenue performance.

- **Coin payment:** Traditional coin-operated mechanisms.
- **Token system:** SBI uses its own token solution. The tokens are sold either manually or through automated dispensers.
- **Card payment:** Accepts both physical payment cards and mobile payments via card readers. Nayax is our standard solution for card-based payment processing.
- **RFID payment:** Available on special order. Contactless RFID solutions such as wristbands or cards.
- **Token dispensing machines with card payment:** Visitors can purchase tokens directly by card at the machine.

Coin / Token payment: Traditional coin-operated systems are still used for classic rides, arcade games, and small vending machines. We offer two options: mechanical, accepting one coin/token value, or electronic, accepting multiple currencies and coin values depending on setup.

Digital Nayax payment via phone/card: Guests can pay quickly and securely by tapping their phone or card at rides, games, or vending machines. SBI's contactless system reduces queues, eliminates the need for cash or tokens, and simplifies park operations.

Token dispensing machines with card payment: Guests can quickly buy tokens using a debit card, credit card, or mobile payment. The machine accepts the payment and dispenses the selected tokens immediately, reducing waiting times and the need for cash.
